

## Famous Artist Pastiche

For my pastiche I got a man named Rembrandt. I have no idea who this person is so i did some research and it turns out he is just a really good painter. Description of his paintings are said to be full of drama, contrasts between light and dark and experimental brushwork. Looking through his paintings you have his self-portraits, The Prodigal Son in the Brothel, The Night Watch, The Storm on the Sea of Galilee, Christ on the Cross, Sacrifice of Isaac. There are many other paintings but these I find to be such dramatically interesting. I narrowed it down to sacrifice of Isaac, Sea of galilee, and Christ on the cross due to the possibility of them to be turned into pixel art how remaining visually distinctive. Finally, i picked the storm on the sea galilee because it calls out to me about this epic story braving a monstrous ocean sound so cool and is something i can envision with a remarkable story. Based on what i could grasp from the lab layout some base colors of what i saw.

### Section1:

I colored the main shapes the dark and light clouds finding the general placement of the boat and getting the base color of the ocean

### Section2:

I was stuck for a while because i could not figure out how to use the Dithering tool and it made things kind of ugly. Began work on the ocean waves placing half of it Infront of the boat through a layer when I found the Lighten tool it changed how i detailed.

### Section3:

I need to detail the boat and place people on it after that i will play around detailing the sky
